

Assembly Instructions Revive 1 Gaming Stools

Tools required:

- Battery operated impact driver with **Philips #3 bit**. Do not use a Philips #2 bit as this will strip/damage the screw heads and prevent them from being tightened correctly.
- Philips screwdriver (optional)

1. Place the seat/backrest assembly upside down on a table or chair. Remove the 4 screws and their washers (A) and place your old base (mechanism) on top of the plastic spacers. Re-insert the 4 screws with their washers and tighten by hand or using a Philips screwdriver.
2. Now securely tighten the 4 screws using a battery operated impact driver with a **Philips #3 bit**. Do not use a Philips #2 bit to tighten the screws as this will strip/damage the heads of the screws and prevent them from being tightened correctly.
