Smart Casino Seating Solutions

Product Ranges

Gaming Stools for Clubs, Pubs, Hotels and Casinos

Why Karo gaming stools?

“We believe that everyone has the right to sit on a comfortable chair, and it is our purpose to provide this.”

Gaming stools are a significant investment and it is essential that they satisfy the requirements of both the **venue operator** and the **patrons**.

For the venue operator, a **reliable product and cost effective service package** is a priority. The patrons, on the other hand, demand a **clean** and **ergonomically comfortable** seat.

We provide a smart solution

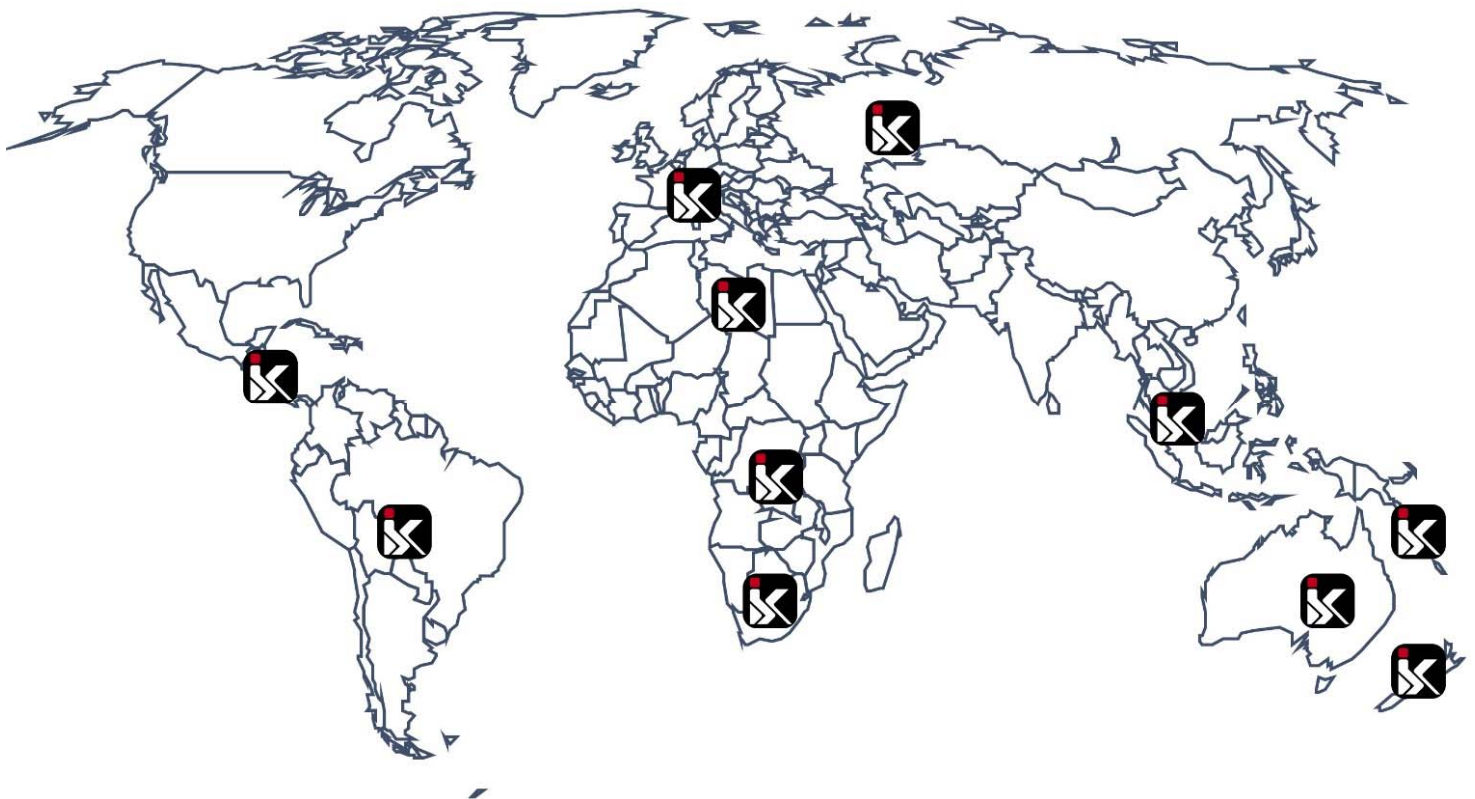

- **Weld-Free Design** – Our unique *weld-free* design for pedestal stools eliminates the catastrophic failures commonly associated with chairs that have welded joints.
- **Glue-Free Upholstery** – Our *glue-free* upholstery permits cost-effective re-upholstery to prolong the life of your investment.
- **Interchangeable Heights** – Our exclusive *taper-lock* design allows our pedestal stools to be easily converted from one height to another at a fraction of the cost of a new stool.
- **Quality Focus** – Internationally certified ISO 9001:2015 Quality Management System.
- **Comfort** – To improve comfort and longevity, our seats are all manufactured in-house using *automotive-grade PU moulded foam*.
- **Experience** - Established in 1986, Karo is a specialist manufacturer of seating products for the gaming industry.
- **Global Customer Base** – Our clients are spread across five continents
- **Warranty** – The heavy-duty and robust design permits us to offer a 7-year warranty on all our products (T&C's apply).
- **Environment** – Environmental sustainability is integrated into our strategic planning and we actively develop processes and systems to reduce our impact on the environment.

International Client Base

Our club, hotel and casino clients are spread across five continents.
